

VIGNAL production site - Corbas - France

VIGNAL SYSTEMS SA (France – Corbas) is specialized in designing, manufacturing and marketing **lighting and signaling products and systems** for industrial and commercial vehicles. (tails light, side lights, directional lights, revolving lights, etc.)

Main customers are manufacturers **of on-road and off-road vehicles**: trucks and trailers, coaches and buses, agricultural equipment, light commercial vehicles, forklifts, trains, special vehicles, etc.

VIGNAL is a European leader on both **OEM** and **after-markets**.

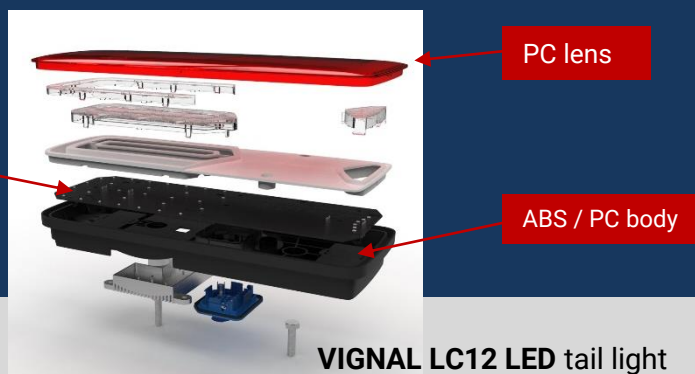

VIGNAL has been a BILLION customer for a very long time with hydraulic injection molding machines. For 2 years now, the company has been implementing **100% electric** single and multi-component machinery such as SELECT 150T, 300T, 400T, etc.

Key advantages for selecting BILLION machines: **most advanced technology, highest quality, performance**, as well as **multi-injection know-how**.

SELECT all-electric range also meets VIGNAL's requirements for **environment friendly equipment**.

Production example: tail light for truck

VIGNAL implements **multi-injection process** in order to manufacture its LC12 LED tail light. The **2-color lens** is made of **polycarbonate** for a better resistance to impacts.
